## PERSONAL STATEMENT

I'm an active graphic designer and web developer passionate about front-end design and the grind to tie it to a killer UX and brand. I have explored the vast world of my industry through studies of UI/UX, design principles, web technologies, branding, printing, layouts and programming.

I love to be in a constant state of learning by exploring the world of design and structure around me, both on streets and buildings, but also through the web as well. I effectively draw in all of these inspirations and not only attempt to learn how it was composed, but also attach my own elements to it to really make it my own.

## SPECIALITY SKILLS
